

gko::log::Logger

```
classDiagram
    class gko_log_BatchConvergence["gko::log::BatchConvergence< ValueType >"]
    class gko_log_Logger["gko::log::Logger"]
    gko_log_BatchConvergence --|> gko_log_Logger
```

The diagram illustrates a class hierarchy. At the bottom is a light gray box labeled 'gko::log::BatchConvergence < ValueType >'. A blue arrow points upwards from this box to a white box at the top labeled 'gko::log::Logger', indicating that 'BatchConvergence' inherits from 'Logger'.

gko::log::BatchConvergence  
< ValueType >
